When user tries to click or hover on past dates which is blured colored

then user will get nothing because it is unclickable. So user always have to click today or from today dates.

When user tries to click departure dates before arrival dates. Then user will get a error message and user have to select dates again; Departure date and time always needs to be after arrival date and times.

ERROR

Please select arrival date before departure date!

Start Again

When user tries to click on reserved dates then user will get error message and user have to click the dates again.

ERROR

Please select available dates!

Start Again
